

SAYUDH KHATAVKAR

Data Analyst

☎ +91-7021466229 ✉ [Email](#) 🌐 [GitHub](#) 🔗 [LinkedIn](#) 🌐 [Portfolio](#)

Summary

Results-driven Data Analyst with strong expertise in SQL, Python, Excel, and Power BI, specializing in data cleaning, data analysis, and data visualization. Experienced in exploratory data analysis (EDA), dashboard development, and generating actionable insights to support business decision-making. Proficient in working with large datasets, statistical analysis, and reporting to improve operational efficiency and performance. Strong problem-solving skills with a focus on delivering data-driven solutions in fast-paced environments.

Skills

Programming & Querying: Python, SQL, C++

Data Analysis & Visualization: Data Analysis, Data Cleaning, Exploratory Data Analysis (EDA), Data Visualization, Dashboard Development, Power BI, Tableau, Microsoft Excel

Libraries & Frameworks: NumPy, Pandas, Matplotlib, Seaborn, Apache PySpark

Cloud & Big Data Technologies: Microsoft Azure, AWS

Core Concepts: Statistical Analysis, Descriptive Statistics, Business Intelligence (BI), Insight Generation, Data-Driven Decision Making

EXPERIENCE

Data Analyst Intern

January 2026 – May 2026

LogisticsNow (On-site)

Tools: Excel, SQL, Power BI

- Analyzed large-scale logistics datasets using SQL and Excel to support KPI tracking, reporting, and operational performance analysis.
- Designed and developed interactive Power BI dashboards for data visualization of freight costs, shipment trends, and transporter performance.
- Conducted data analysis during reverse auctions to evaluate transporter quotations and drive cost optimization decisions.
- Performed data cleaning, preprocessing, and exploratory data analysis (EDA) to ensure data quality and generate actionable business insights.

Research and Strategy Intern

June 2025 – July 2025

Skylark Lifestyles Pvt. Ltd. – Aeronext Solutions (Remote)

Tools: Python, Machine Learning, Power BI

- Conducted market research and spatial data analysis to evaluate airport commercial zones and identify opportunities for non-aeronautical revenue growth.
- Built a machine learning-based HVAC optimization model to analyze passenger flow and environmental factors, improving energy efficiency and increasing non-aeronautical revenue.
- Designed Power BI dashboards to visualize passenger trends, commercial performance, and space utilization insights for data-driven decision-making.

Projects

AeroNexus AI – Airport Revenue Optimization Platform

May 2025 – June 2025

Tools: Python, SQL, Streamlit, Power BI, Surprise, TextBlob — GitHub

- Developed an AI-powered dashboard using Streamlit to analyze airport operations and passenger behavior for data-driven decision-making.
- Implemented a recommendation engine (Surprise), dynamic pricing model (Q-learning), and sentiment analysis (TextBlob) to enhance revenue optimization and customer experience.
- Performed data cleaning, preprocessing, and exploratory data analysis (EDA) to generate actionable insights and ensure data quality.

IPL Data Pipeline using Apache Spark & AWS S3

August 2025 – September 2025

Tools: Apache Spark, Databricks, AWS S3, Python, MySQL — GitHub

- Built a scalable data pipeline using Apache Spark on Databricks to process large IPL datasets.
- Integrated AWS S3 for data storage and performed ETL operations using PySpark for data transformation and cleaning.
- Validated data in MySQL and conducted exploratory data analysis (EDA) to derive insights on player performance and match trends.

- Built an end-to-end real-time healthcare data pipeline using Azure Event Hub, Data Factory, and Databricks to ingest and process streaming hospital data.
- Implemented Medallion Architecture (Bronze, Silver, Gold) in Azure Data Lake to clean, validate, and standardize healthcare datasets.
- Developed data transformation workflows using PySpark in Databricks to handle noisy and inconsistent healthcare records.
- Designed a star-schema data warehouse on Azure SQL/Synapse to support efficient querying and analytics.
- Created interactive Power BI dashboards to visualize patient admissions, bed occupancy, and hospital performance metrics.

Awards & Certifications

NPTEL: Python for Data Science — Completed hands-on training in Python, NumPy, Pandas, data cleaning, exploratory data analysis (EDA), and data visualization (Matplotlib, Seaborn), including regression and classification techniques.

Anthropic:AI Fluency for students — Gained practical experience in AI-assited workflows,applying the 4D Framework to improve decision-making,critical thinking,and ethical use of AI in academic and career contexts

Education

B.Tech in Electronics and Computer Engineering	2022 – 2026
<i>KJ Somaiya School of Engineering, Mumbai, Maharashtra</i>	<i>CGPA: 9.45 / 10</i>
Honours in Data Science	2022 – 2026
<i>KJ Somaiya School of Engineering, Mumbai, Maharashtra</i>	<i>CGPA: 8.46 / 10</i>
Higher Secondary (12th Grade) — Maharashtra State Board	2022
<i>Khalsa College of Arts, Commerce and Science, Mumbai, Maharashtra</i>	<i>Percentage: 71.70%</i>
Secondary (10th Grade) — Maharashtra State Board	2020
<i>Dr. Antonio Da Silva High School, Mumbai, Maharashtra</i>	<i>Percentage: 87.80%</i>
